Novell[®]

What?

- A library to parse and decode Digital Camera RAW files

Why?

- Digital Camera RAW processing is a requirement for any serious digital photography software
- Need to make them first class on a freedesktop.org (GNOME, KDE, etc.)
- dcraw suck

How?

- Over 11KLOC in C++
- LGPLv3 licensed
- C API

Who?

- Bradley Broom
 - Minolta MRW support
- Rafael Espíndola
 - NEF decompression
- Me
 - Thanks to Novell ITO to give me some time to hack

When?

- Version 0.0.5 now
- More feature as time flows.

Where?

- Web page

`http://libopenraw.freedesktop.org/`

- Source code

`git://anongit.freedesktop.org/git/exempi.git`
